

Teka Step Easy Slope Mobile Safety Steps

The TekA Step Easy Slope mobile safety steps have a gently sloped (45 degree) step angle. Constructed using welded 25mm steel tube and plate making these steel safety steps both robust and attractive. These mobile safety steps have a safe working load capacity of 500 Kg. A choice of 5 colours are available.

With a range of platform heights and number of treads from 3 to 12, the TekA Step Easy Slope Mobile Safety Steps are the perfect solution for all construction, retail, commercial, office, warehouse and industrial applications.

A wide range of optional extras to match the warehouse steps with your requirements are available from the drop down boxes such as extra deep platforms, platform gates, bars and L&R chains. We recommend you add at least a 250mm platform extension when ordering any platform gate, bar or chain.

Standard Platform Size W x D: 559x500mm
